

**mcd** PLATES &  
GASKETS

A world leader in manufacturing and supplying of plate heat exchanger parts  
Un leader mondial dans la fabrication et la fourniture de pièces adaptables pour échangeurs thermiques à plaques

## Traceability, quality, reactivity...

### **OUR AIM: MEETING YOUR EVERY NEED**

MCD is **world leader** in the manufacturing and supply of gaskets for all brands of plate heat exchangers. Our reputation is based not only on **customer relations** but also on the quality of our human and technical resources :

- Production capacity of over 1.5 million gaskets annually; from very small to very large models, such as Alfa Laval T50-M, Hisaka UX100/130 or the APV Sirius series,
- Widest, evolving range of products on the market,
- In-house manufacture of gasket-processing tools (enables us to respond quickly to the needs of our clients),
- In-house formulation of our elastomers (enabling us to propose the quality that matches constructor brands),
- All our production processes are fully traceable so clients can measure the suitability of our methods on a daily basis,
- Full monitoring of all raw materials, in compliance with REACH regulations.

### **A WIDE RANGE OF PLATES**

From single plate to complete sets, MCD offers you an ever evolving range of some of the most advanced, fully guaranteed plates. Flexibility and excellence are guaranteed by our partnership with plate manufacturers; MCD checks the Quality Certification for all alloys and production procedures used (homologation of moulds). It has a pressing capacity of up to 25 000 tons and an approved cutting calibre (steel tooling, plate thickness tolerances after pressing, uniformity).

MCD guarantees full traceability of all its plates.

brand

## WORLD CLASS LOGISTICAL SETUP

MCD relies on an advanced supply chain to meet the demands of its clients and also to anticipate future requests:

- Large stock of strategic products for all brands,
- Partnerships with major international hauliers,
- Best choice of service based on purpose and needs,
- Real-time tracking of orders,
- Helpful, responsive Customer Services, able to respond to all your queries.

## R&D: INNOVATION AND EXCELLENCE

MCD strives to improve the quality of its elastomers and the lifetime of its gaskets by continually keeping abreast with changes in technology, legislation and international standards and by monitoring the qualification and control of its products and processes. MCD also provides **technical assistance for all plate heat exchange-related matters**: configuration, maintenance. **MCD is based in France.**

## A CULTURE OF ENVIRONMENTAL SAFETY: FULL COMMITMENT AND INVOLVEMENT

MCD is fully committed to environmental safety and compliance with the work conditions of its employees by:

- Providing regular training and information relating to safety,
- Motivating employees to contribute to the improvement process.

MASE certification in France and ISO 14 001 in China enables it to:

- Guarantee MCD clients optimum safety procedures for the services it provides,
- Comply fully with Health and Safety regulations.

Sustainable development:

- All waste is recycled at suitable recycling centres,
- Waste water is handled in-house, and therefore, does not affect the environment.
- Emissions are kept under control.
